

SEYED AHAMED IFTHIKAR

Full Stack Developer

Dubai, UAE | meetifthikarhere@gmail.com | +971503717291 | [GitHub](#) | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Creative Full Stack Developer with 1.5 years of hands-on experience developing and customizing modern web applications using Next.js, with a strong focus on performance, usability, and responsive user experiences. Experienced in implementing AI-powered solutions using RAG (Retrieval-Augmented Generation), Vector Databases, and OpenAI models, along with developing frontend components, RESTful APIs, and resolving UI and functional issues.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, Tailwind CSS, Responsive Web Design, UI/UX Implementation
- **Backend:** Node.js, Express.js, REST APIs
- **Languages:** HTML5, CSS3, JavaScript (ES6+)
- **Databases:** MongoDB, MySQL
- **AI / LLM Integration:** RAG Architecture, OpenAI APIs, PGVector, Qdrant, Embeddings, Semantic Search
- **Cloud & Deployment:** Vercel, Firebase, GitHub Actions (CI/CD), Docker
- **Specialized:** MERN Stack Development, SEO, Accessibility (A11y), Cross-browser Compatibility
- **Tools:** Git, GitHub, VS Code, Postman, Debugging, Peer Code Reviews, Agile/Scrum, Jenkins (CI/CD), N8N
- **Design & Layout:** Material UI, Elementor, Page Builders, Responsive Design

EXPERIENCE

Full Stack Engineer at Almosafer (Dubai UAE)

February 2026 - Present

- Developed and integrated an AI-powered chatbot into the Almosafer hotel booking platform using Next.js, Supabase, OpenAI API, and RAG architecture, enabling context-aware, real-time responses to user queries.
- Designed and implemented a full end-to-end RAG pipeline with intent detection and query routing, separating structured data queries (pricing, amenities) from unstructured content (policies, FAQs) to improve accuracy.
- Built a document ingestion and vector search system using text chunking, OpenAI embeddings, and PGVector, significantly reducing LLM hallucinations in generated responses.
- Developed and enhanced the Almosafer hotel booking clone platform using Next.js and React.js, including dynamic hotel listing and detail pages with optimized navigation flow.
- Integrated backend APIs for real-time hotel data (pricing, amenities, availability), ensuring accurate and synchronized frontend rendering.
- Improved UI/UX and frontend performance through responsive design, reusable React components, and optimized rendering.
- Built a CRUD-based admin dashboard using Next.js, Material UI, and Tailwind CSS to manage hotel stay details, implementing full Create, Read, Update, and Delete functionality with dynamic forms and reusable UI components.
- Integrated frontend with backend APIs to ensure real-time data updates and seamless synchronization of stay records across the system.

CERTIFICATIONS

- MERN Full Stack Development – Udemy
- Full Stack Web Development Course - Intellia
- AI for India 2.0 – Guvi
- Python Programming – Guvi
- MongoDB Essentials – Great Learning

EDUCATION

Bachelor of Technology (B.Tech) – Information Technology

Mohammed Sathak A.J. College of Engineering, Chennai (Anna University)

2021 – 2025 | CGPA: 8.2
